

## **Intrinsic Innovations Expands to Singapore and Malaysia, Bridging Asia and North America!**

We are thrilled to announce that Intrinsic Innovations has taken a significant step forward in our global expansion journey by establishing a presence in Singapore and Malaysia. This move marks a pivotal moment for us as we strengthen the bridge between Asia and North America, unlocking endless possibilities for businesses on both sides of the globe.

Our Co-Founder and CEO, Andrew Sanden, recently had the honor of delivering a keynote address at SWITCH (Singapore Week of Innovation and Technology), where he unveiled our expansion plans and highlighted the wealth of opportunities available to Asian businesses contemplating a move to Canada. It was an inspiring moment that underscored the potential for growth and innovation that exists within this dynamic partnership.

We were also privileged to have Mr. Wang Fei, Vice President of TusStar and CEO of TusStar Asia Bridge (Singapore), share his insights in a compelling keynote, followed by an engaging panel discussion. Together, we explored the synergies and bilateral opportunities that lie at the heart of this transformative venture.

- **Ravenna Chen** [Moderator], Partner, Intrinsic Innovations Singapore, Director of APAC, TusStar
