

Intrinsic Innovations is Awarded a Grant by the Government of Alberta

CALGARY, September 6, 2022 – Intrinsic Innovations (Intrinsic) is very excited to be a recipient of the Government of Alberta’s grant. The grant is awarded to Intrinsic by Alberta Innovates under the Ecosystem Development Partnerships (EDP) Program.

The EDP Program is designed to support entities to enhance the research and innovation ecosystem in Alberta. The program is to assist various companies and organizations to converge services and initiatives working together to create provincial strengths, new industries and enhance value throughout the entire system and its operations. The EDP Program partners are:

- providing communities, services and supports for inventors and entrepreneurs traversing the client journey;
- supporting key markets with the ability to implement and adopt innovations;
- accelerating the development and/or application of emerging technologies and technology companies, and building capacity, platforms and/or networks.

The grant is to support the Entrepreneur Growth and Commitment to Alberta initiative developed by Intrinsic with the purpose to help international start-ups in the innovation space to establish their business in Alberta and stay in Alberta. When a company commits to Alberta, Intrinsic will commit to that company, offering up to two years of programming and support. Intrinsic will assign a client advocate who will meet weekly with the company team, for a period of one to two years, to ensure that they are making progress and connecting within the community.
